DANNY BASAVARAJU

+1 (628) 310-5660 | danny.basavaraju@gmail.com | San Francisco, CA, USA | linkedin.com/in/dannybasavaraju/ | github.com/dannyb66 | dannyb66.github.io | youtube.com/@sohamhamso | sohamhamso.org

Enterprise AI and platform engineering leader with 9+ years across AI/ML, cloud, SRE and platform transformation. Built governed agent platforms, multi-tenant SaaS and real-time data systems across AWS, GCP and Azure; led delivery with Terraform, Kubernetes, CI/CD and observability.

EDUCATION

Indian Institute of Technology Delhi (IITD) — **August 2012 - May 2016**
Bachelor's, Computer Science — *GPA: 3.5*

Indian Institute of Management Calcutta — **August 2018 - May 2020**
MBA — *Institute Award, GPA: 3.7*

Hult International Business School, San Francisco — **September 2025 - May 2026**
Global MBA, Technology & Entrepreneurship — *Full Scholarship & Dean's list, GPA: 3.8*

SKILLS

Enterprise AI engineering, Agentic AI, Multi-Agent Orchestration, LangGraph, AutoGen, CrewAI, Model Context Protocol (MCP), Tool/Function Calling, RAG, Vector Databases, LLM Evaluation, Guardrails, Prompt Engineering, Python, TypeScript, Go, AWS, Amazon Bedrock, Amazon SageMaker, GCP, Azure, Kubernetes, Docker, Terraform, CI/CD, SRE, AIOps, Prometheus, OpenTelemetry, Datadog, Dynatrace, Splunk, Service Mesh, Platform Architecture, Distributed Systems, Observability, Incident Management, Governance, Security, Snowflake, SQL, React, Next.js, Node.js, Technical Leadership, Mentorship

PROFESSIONAL EXPERIENCE

TREK HEALTH — **San Francisco, CA, USA**
Principal Engineer — *June 2025 - Present*

- Architected a multi-tenant AI and contract-intelligence platform serving 100+ clients on 5TB+ of data.
- Designed multi-agent orchestration with state management, tool registries and scoped MCP integrations.
- Engineered governed Python agents on AWS Bedrock and automated release quality with replay and end-to-end tests.
- Architected secure multi-cloud delivery across AWS, Azure and GCP with Terraform, Kubernetes and CI/CD.
- Established AI governance, cost and latency budgets, incident response and rollback for production LLM workflows.
- Standardized Kiro-assisted delivery and reference agent patterns; mentored 10+ engineers on platform design.
- Led platform delivery across 158 API routes and 442 Snowflake procedures, authoring ~48% of 4,700+ commits.
- Hardened tool calling with guardrail gates, prompt-injection defense and tenant isolation across 20+ tools.

SYBILL — **Mountain View, CA, USA**
Senior Software Engineer (Founding Engineer) — *January 2024 - June 2025*

- Built production AI workflow automation in LangGraph, improving engagement 30% and user-flow efficiency 15%.
- Designed secure, governable Python, Node.js, React and Next.js services for AI sales products.
- Built MCP integrations connecting LLM assistants to CRM and enterprise systems across sales workflows.
- Instrumented GenAI workflows with OpenTelemetry, Prometheus and Datadog, raising automation 40% and cutting effort 25%.

QUANTGRO WEALTH MANAGEMENT — **Bangalore, KA, India**
Senior Software Engineer (Founding Engineer) — *May 2023 - January 2024*

- Engineered AI/ML trading and predictive analytics models, improving decision-making 35% and operating efficiency 40%.
- Built real-time financial data and analytics pipelines, cutting latency 50% and improving trade execution.
- Developed RAG and vector-search research workflows and evaluated Amazon Bedrock after its September 2023 launch.
- Deployed backend platforms and internal tooling for fund management, cutting manual effort 45% and improving reliability.
- Led a cross-functional team of 5 developers, accelerating releases 30%.

CHILL PANDA TECH — **San Francisco, CA, USA**
Senior Software Engineer (Founding Engineer) — *January 2022 - May 2023*

- Deployed a multi-tenant SaaS platform with 99.9% uptime, launching a working prototype in three months.
- Engineered real-time transaction processing for $1M+ in orders and onboarded 10 enterprise clients.
- Integrated OpenAI GPT and NLP into personalized customer interactions, improving retention 25% and reducing support queries 40%.
- Developed AI/ML pricing optimization models, increasing revenue 30% through personalized displays and order workflows.
- Built modular services and React/Next.js engagement surfaces, accelerating releases 50% and improving customer experience.

- Instrumented production workflows with Prometheus metrics and alerting to improve availability and incident response.

BYJUS **Palo Alto, CA, USA**
Product Manager (AI & Strategy) *January 2020 - January 2022*
- Led product strategy, AI-driven sales, marketing and revenue optimization for a $40M Amazon business, driving 50% growth.
- Designed a $15M AI-powered sales and marketing plan using predictive analytics and pricing optimization for seasonal ROI.
- Managed product lifecycle and inventory optimization for 43 SKUs, driving $75M in Amazon revenue.
- Integrated AI supply-chain analytics for logistics resilience, cutting delays and adding $10M in global revenue.
- Partnered with executives on data-driven AI strategy, presenting intelligence to the CEO and Board.

RIVIGO **Bangalore, KA, India**
Senior Software Engineer *January 2016 - January 2018*
- Developed logistics software for a Pan-India hub network, enabling real-time operations and the driver relay model across 100+ cities.
- As sole developer, built the core Pickups module, handling 300,000+ pickups across 100+ cities and improving delivery efficiency.
- Led 3 engineers building analytics dashboards for 100+ clients, enabling real-time messaging, shipment tracking and insights.

ENTREPRENEURIAL VENTURES & PROJECTS

CODEX SELF-HOSTED **San Francisco, CA, USA**
Open-Source LLM Inference Platform *September 2026 – Present*
- Architected self-hosted LLM inference with vLLM, AWS GPUs, ECS, EC2 ASG and Terraform.
- Boosted 27B model throughput 7x (14→100 tok/s) with vLLM speculative decoding at ~96% token acceptance.
- Evaluated 5 open models (AWQ/FP8/INT4, 14B–30B incl. MoE) on A10G/L40S GPUs for agentic coding.
- Optimized GPU economics: image 34GB→9GB, cold start 17→11.5 minutes, $0 idle, 14B–27B models at ~$0.52–1.07/hr.
- Secured inference with IAM/MFA and an SSM tunnel, no public ingress; built a proxy fixing vLLM 400s.
- Integrated MCP tool calling and Kiro-assisted development with Terraform-managed GPU serving and Bedrock comparisons.

SOHAMHAMSO **San Francisco, CA, USA**
AI-Assisted Multilingual Sanskrit Reader *December 2022 – Present*
- Built a 12-language, 3,023-verse corpus with 36K+ translations and 256K+ word glosses.
- Shipped an AI-native platform on Astro, Cloudflare Workers and Turso, unifying reader, data and video automation.
- Built an automated text-to-video pipeline with TTS narration in 10 voices, React/Remotion rendering and R2 storage.

SPONSORSKIP **San Francisco, CA, USA**
Agentic AI Hackathon *September 2024*
- Developed SponsorSkip with LLM agents and NLP for transcript ingestion, sponsor classification and ad skipping.
- Prototyped agentic ad detection at a Fetch.ai hackathon in 24 hours with 4 teammates, placing first of 50.

MULTIPLE EARLY-STAGE STARTUPS **Bangalore, KA, India**
Advisor and Consultant (Part-time) *October 2021 - Present*
- Developed pitch deck and fundraising strategy from scratch for Developer SaaS startup, planning outreach to angel investors and VCs
- Joined India's first Web3 accelerator, Founder-ship, engaging founders, angel investors and VCs on startup strategy and fundraising
- Supported EdTech startup with 25k downloads and $20K ARR in product strategy, fundraising support, planning and go-to-market

ARICEUM (COURSERA FOR HIGH-SCHOOLERS) **San Francisco, CA, USA**
Chief Product & Technology Officer *January 2022 – May 2022*
- Co-founder and CPTO shaping product and technology strategy for high-school access, targeting 100M students by 2030.
- Led 5 developers and designers to ship an AWS, React and Django MVP in two months.
- Instrumented the MVP with Prometheus and OpenTelemetry for monitoring, release reliability and incident response.

ACADEMIC DISTINCTIONS

- Earned MBA Dean's List honors for Semester 1 at Hult with a GPA of 3.8/4 for academic excellence.
- Named 1/22 Institute Award recipients and honored with the first-year DVC award for Credible & Outstanding Performance.
- Secured CGPA Rank 3 in term 2 (GPA 3.9/4) and held CGPA Rank 14 through term 2 (CGPA 3.6/4).
- Achieved IIT-JEE All India Rank 30, top 0.6% of 479,651 applicants, and secured 1/848 IIT Delhi seats.
- Achieved AIEEE All India Rank 35 (B.Arch) and Rank 68 (B.Tech), top 0.11% of 1,137,256 applicants.
- Achieved State Rank 8 in the Mathematics Olympiad and ranked 1st/2nd for 10 consecutive years at Atomic Energy Central School.
